Internships in Spain

Our adventure with Spanish culture began with a plane trip to Malaga, where we then went by bus to Úbeda - our home for the time of departure.

The most numerous profile on our trip was nutrition and catering services. Everyone in this area was satisfied with the place of their practices, and some liked it so much that they did not want to come back.

Next, in terms of numbers, were veterinarians. The girls got along well with their tutors and they liked the care of the animals and the tasks entrusted to them.

The smallest group were farmers. The boys liked their farms and the activities they were struggling with on a daily basis.

Our first trip was a trip to Baeza. It is a twin town to Úbeda. We spent a nice afternoon with Ms.Agnieszka from EuroMind, our guide to this place. She showed us many interesting places and a beautiful landscape from the viewpoint.

Just a week after our arrival we went to visit Cordoba. Together with our guides Ms. Monica and Ms. Agnieszka from EuroMind, we watched many interesting places and monuments.

A week after the trip to Cordoba we went to the warmest city of Andalusia, namely Malaga. The city is located on the Alboran Sea is famous for its beautiful views. The guide in this city was Ms.Lena Kaszycka from EuroMind.

Our last trip was a trip to Grenada. The way of visiting this city was slightly different from the previous ones, this time we got our city maps and selected points that are worth visiting. The idea was very interesting and appealed to all participants.

Indicative distances of our trips from our place of stay.
